MAPS AND LANDSCAPES:

CHINESE RARE BOOKS

DIGITAL COLOURING BOOK

ABOUT THE COLOURING BOOK

The Maps and Landscapes colouring book series contains images from UBC Library's Open Collections, a publicly-accessible resource for digital collections created from materials held at branches across the Library:

Chinese Rare Books includes materials from UBC's Asian Library, mainly the Puban and Pang Jingtang collections. The Puban Collection was acquired by UBC in 1959. With numerous rare editions in subject fields such as history, literature, philology and philosophy, it is one of the most distinguished Chinese collections in North America. It contains some 3,200 Chinese titles in about 45,000 volumes in thread-stitched binding. >>
